

Comcast fiber for Talavera neighborhood

Comcast Fiber

Comcast is submitting an application to the Connect New Mexico Fund for expanding fiber internet service to the Talavera neighborhood on March 1. The Connect New Mexico Fund subsidizes network deployment for underserved areas, aiming to provide broadband access to residents, businesses, and institutions. What Comcast is proposing would bring fiber-to-the-home internet as well as the full suite of Xfinity/Comcast services to Talavera.

Your Help

Both Dona Ana County and the TCA Board are planning to provide letters of support. Interested Talavera homeowners are invited to provide letters of support as well. Below are links to a letter of support template and a map with the Talavera neighborhood shaded in purple. Letters should be emailed directly to [Julianne Phares@comcast.com](mailto:Julianne.Phares@comcast.com) by March 1 so she can attach them to the application and digitally upload them to the State of New Mexico.
